

# ABOUT ALL FOR EYES

COPING with my own vision problems led me on a global quest. I found many useful, off-the-shelf items that helped me.

In addition to glasses from my optician, I developed a combination of vision aids for specific tasks – reading fine print, focusing on distant objects, using the computer, watching TV.

If you have vision problems, having a set of vision aids is crucial. ALL FOR EYES welcomes you to browse, experiment, and assemble your own special vision-kit.

If you have good eyesight, you are invited to explore how best to protect your most precious asset – your eyes.

Sharon Siddique, PhD  
Managing Director  
ALL FOR EYES Pte Ltd

offers a wide range of vision aids, eye supplements and information on eyes. We complement the care of ophthalmologists, opticians, and optometrists. Our shop is located in the Orchard Road area, near various medical centres.
